## Wood Preservatives

12-13-90

Who has jurisdiction over the use of CCA-treated wood?

Who would set a tolerance for water in contact with treated wood?

Does FDA set a food-additive regulation & if so, are they willing to?

FDA must make the call.

EPA should write a letter to registrants of wood preservatives telling them they are encouraging people to exceed tolerances & they must change the advertising and CIS to make this very clear.

Use TSCA rule as a hammer.

Possible inspections for advertising material?
